MR991

theramagnetic
MR991

The **most technologically evolved** system to improve face and body imperfections

The non-invasive solution that restores natural beauty, improves health and offers a renewed psychophysical sense of balance.

The **Theramagnetic** treatment is pleasing and relaxing for patients. It works on the entire body, producing a general sense of well-being and stimulating cell regeneration thanks to the exclusive patented **D.E.S. Technology** system, whereby an effective **endomassage** is combined with the renowned properties of **magnetic microcurrents based on stochastic resonance**.

for HER and for HIM

Theramagnetic is much more than a simple beauty treatment.

It is a unique experience that regenerates the body and mind, making it possible to rediscover one's natural psychophysical balance for an improved sensation of well-being.

MANTIS

Patented
D.E.S.
Technology

DES technology

D.E.S. Technology - Dual Energy System
A patented system that combines the use of two high-performance technologies: one **mechanical** (MRM) and one **energetic** (CMPS).

MRM

Mechanical Manipulation with Motorised Rollers

Two motorised rollers mechanically reproduce a manual **MRM massage (Mechanical manipulation with motorised rollers)**, but with improved results.
It is a **non-invasive** treatment defined as an **ENDOMASSAGE**, which combines the two-way movement of the motorised rollers with skin suction, for a deeper and more effective action on the blemish being treated, with the possibility to work at different power levels and frequencies.

CMPS

Magnetic microcurrents based on stochastic resonance
CMPS - Magnetic Microcurrents based on Stochastic Resonance - are an excellent cell regenerator able to improve and speed up the exchange of substances between cells.
Magnetic microcurrents stimulate fibroblasts, the heart of connective tissue, encouraging proliferation. The cells therefore receive an increased supply of oxygen and naturally eliminate waste substances.
Skin tone is thus restored, along with a healthier, more luminous appearance. The results of **CMPS** are immediately visible and last over time.

*“Since I’ve started using the Mantis, **I feel renewed** and **full of energy**.”*

theramagnetic MR991

Handpieces

MAXI DES (MRM+CMPS)

Featuring two bidirectional rollers, a pulsated suction system and CMPS, the MAXI DES handpiece is ideal for treating large areas such as buttocks and thighs.

MINI DES (MRM+CMPS)

Featuring the same characteristics as the MAXI DES handpiece, but smaller in size, this option is ideal for treating smaller parts of the body, such as legs, arms and abdomen.

MAXENERGY (CMPS WITH CAPACITOR DISCHARGE)

A handpiece consisting in a special Magnetic Microcurrent system that works on skin blemishes, improving and encouraging cell regeneration.

VIXO (CMPS+MICRO SUCTION)

The micro suction and CMPS system characterising the VIXO handpiece work specifically on face and neck blemishes for an anti-ageing effect.

Fields of application

AESTHETIC
The last frontier in the anti-ageing and body shaping field

FITNESS
Targeted toning and muscle “training”

WELLNESS
For the body, mind and soul

THERAPEUTIC
An alternative to restore normal physiological conditions

Actions

Theramagnetic, through specific handpieces, protocols and personalised programmes, leads to tangible, measurable and long-lasting results visible from the very first treatments.

Theramagnetic recharges your body’s batteries!

The stochastic microcurrents help soothe pain and balance circadian rhythms, reinvigorating the cell during its phase of life.

MANTIS

- Anti-ageing
- Lifting
- Remodelling
- Reduces fats
- Drains
- Lipolytic-Slimming
- Antioxidant
- Stimulates fibroblasts
- Strengthens and improves tissue elasticity
- Lymphatic draining
- Regenerates tissues after pregnancy
- Improves microcirculation
- Ideal for pre and post-liposuction*
- Relieves muscle and joint pain*
- Reduces rheumatic pain and inflammation*
- Encourages the re-absorption of oedemas*
- Reduces the limitations of motor functions*
- Intervenes in inflammatory processes*
- Suitable for post-injury rehabilitation*
- Suitable for post-operative rehabilitation*
- Suitable for long-term treatment of chronic or inflammatory illnesses*

* Therapeutic protocols medical version

MANTIS

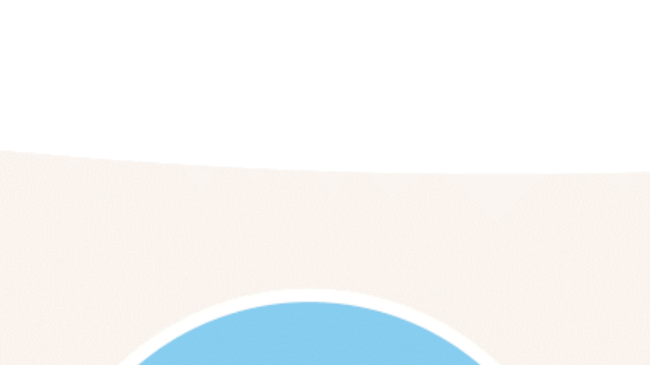

Measurable and visible results!

More than 90%

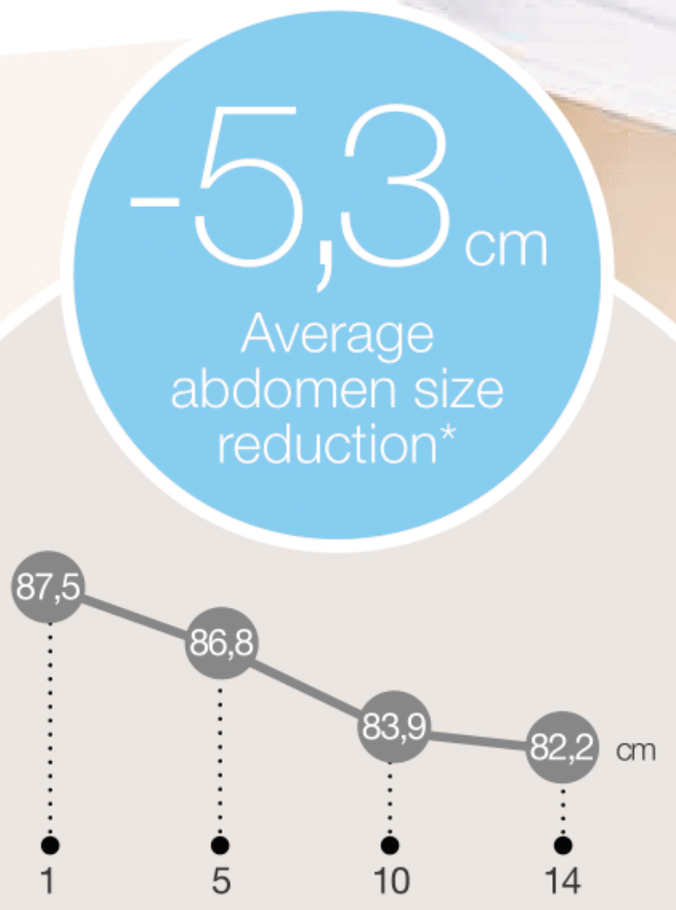

of clients expressed a **positive opinion** on the outcome of the treatment, in particular the **improvement of skin blemishes and reduced signs of ageing.**

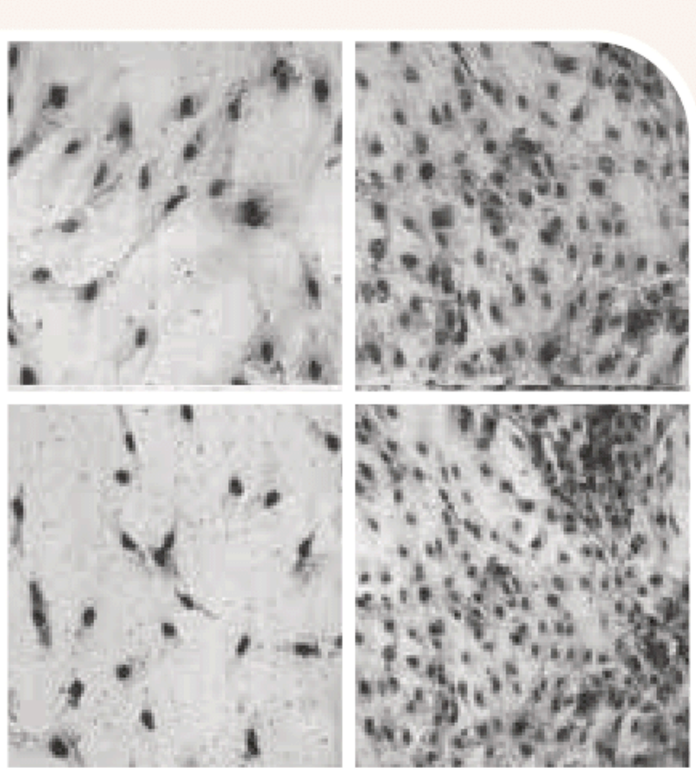

-9,7 cm
Waist size reduction*

*Single case of client following a controlled diet.

-5,3 cm
Average abdomen size reduction*

Real stimulation and proliferation of fibroblasts

+52,65%

Studies conducted on persons that underwent treatments showed a **significant increase (52.65%)** in the proliferative activity of fibroblasts.

theramagnetic MR991

Our results are your success stories!

The slimming, toning and firming effect **is visible right from the very first sessions** and continues over time.

skincare cosmetics

Mantis reinvents cosmetics

Mantis Mantis reinvents cosmetics and beauty treatments.

In line with the most modern scientific research, we have developed M.Skincare, the new range of professional products characterised by their high exclusivity, innovation and added value. A project dedicated to professionals who are aware of their status as a point of reference for an increasingly demanding clientele, ever more attentive to their own well-being.

The new line of face and body cosmeceuticals, thanks to the pool of deeply researched active ingredients, specifically selected based on the objectives of the treatments, enhances the characteristics of Theramagnetic, raising its performance to even higher levels. The use of M.Skincare products in home care helps to maintain and intensify the results obtained with treatments performed at the institute.

Width
600 mm

Height
1950 mm

Depth
600 mm

Weight
100 Kg

Available working perimeter around the device
900 mm

Length of the power cable
2500 mm

Handpiece pipe available working length
2000 mm

Insulation rating
IP20

Protection rating against direct and indirect contact
BF type

Insulation class
1

Power supply
V 230 1ph+N+T

Frequency
50 Hz

Max Vacuum
kPa 70

Circuit breaker switch
A10

Maximum absorbed power
VA 1400

Operating environment

Temperature range	°C	10 ÷ 35
Humidity range	RH	10 ÷ 70%
Minimum atmospheric pressure	hPa	800
Maximum altitude	m.a.s.l.	2000

Storage environment

Temperature range	°C	-20 ÷ 55
Humidity range	RH	10 ÷ 98%

Type of source used
Altair LED model LS572-W

Dominant wavelength
451 nm

Type of emission
Continuous

Power
5100 lumens

Classification
EN 60825-1: 1994 + A1: 2002 + A2: 2001

Directive 93/42/CEE class
IIa

Remote technical assistance

For all its devices, Mantis guarantees remote technical support through an internet connection, and therefore continuous and efficient assistance.
